

Career Assignment: Aircraft Maintenance Engineer

Task: Create your own paper aeroplane and test its ability to fly!

There are lots of different ways you can make a paper plane!

Step 1: DESIGN your plane. What will it look like? How will you make it? What size paper?

*Step 2: TEST FLIGHT!
You must complete a test flight - how well does it fly? Is there anything you could do differently to improve it?*

*Step 3: Maintenance needs to be carried out!
What changes can you make which will make it fly further?*

*Step 4: FLIGHT!
Send your plane on its flight and measure the distance!*
